

## Task 7 : Identify and Remove Suspicious Browser Extensions

Objective: Learn to spot and remove potentially harmful browser extensions.

Tools: Any web browser (Chrome, Firefox).

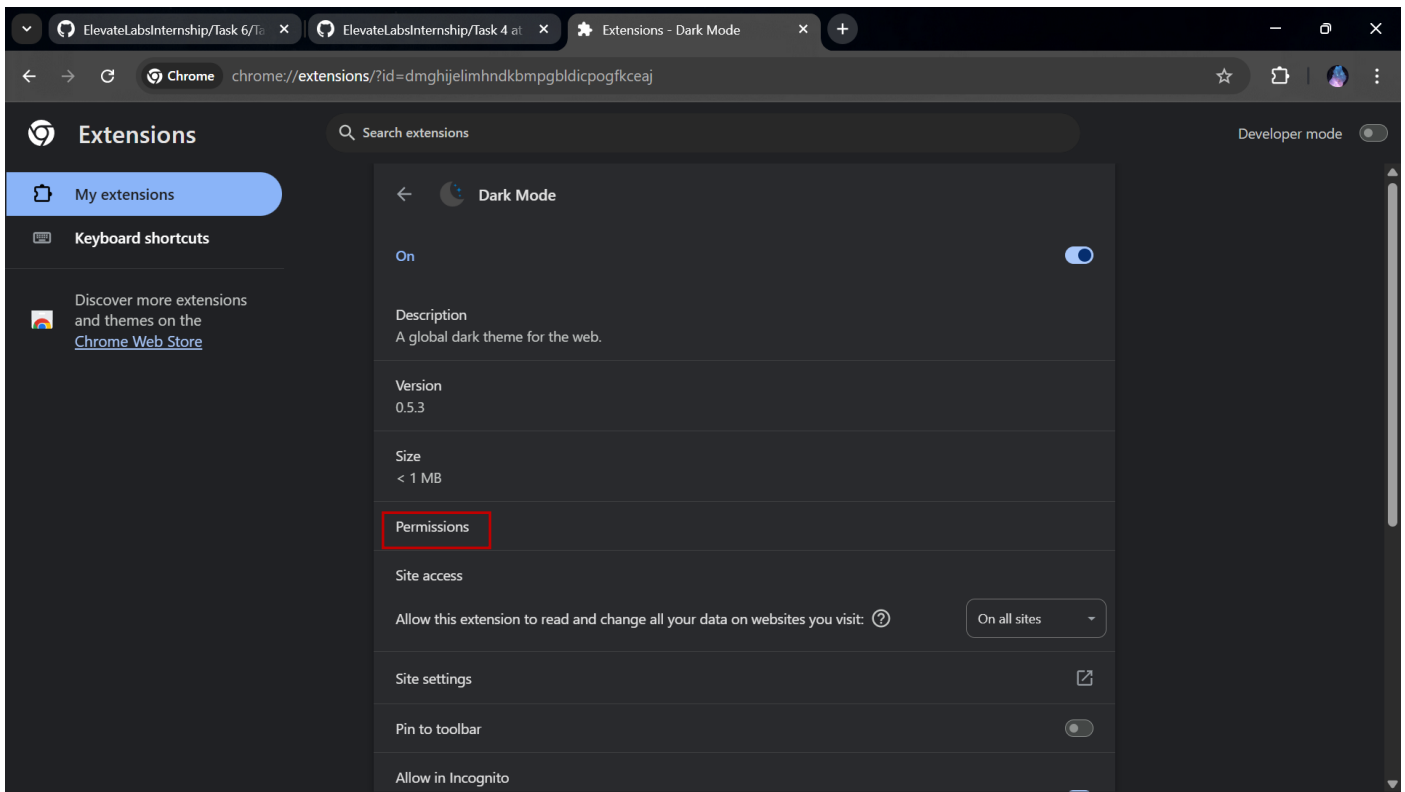

Deliverables: List of suspicious extensions found and removed.

Name: Adobe Acrobat: PDF edit, convert, sign tools.

Purpose: PDF Tool: View, fill, comment, sign, convert and compress.

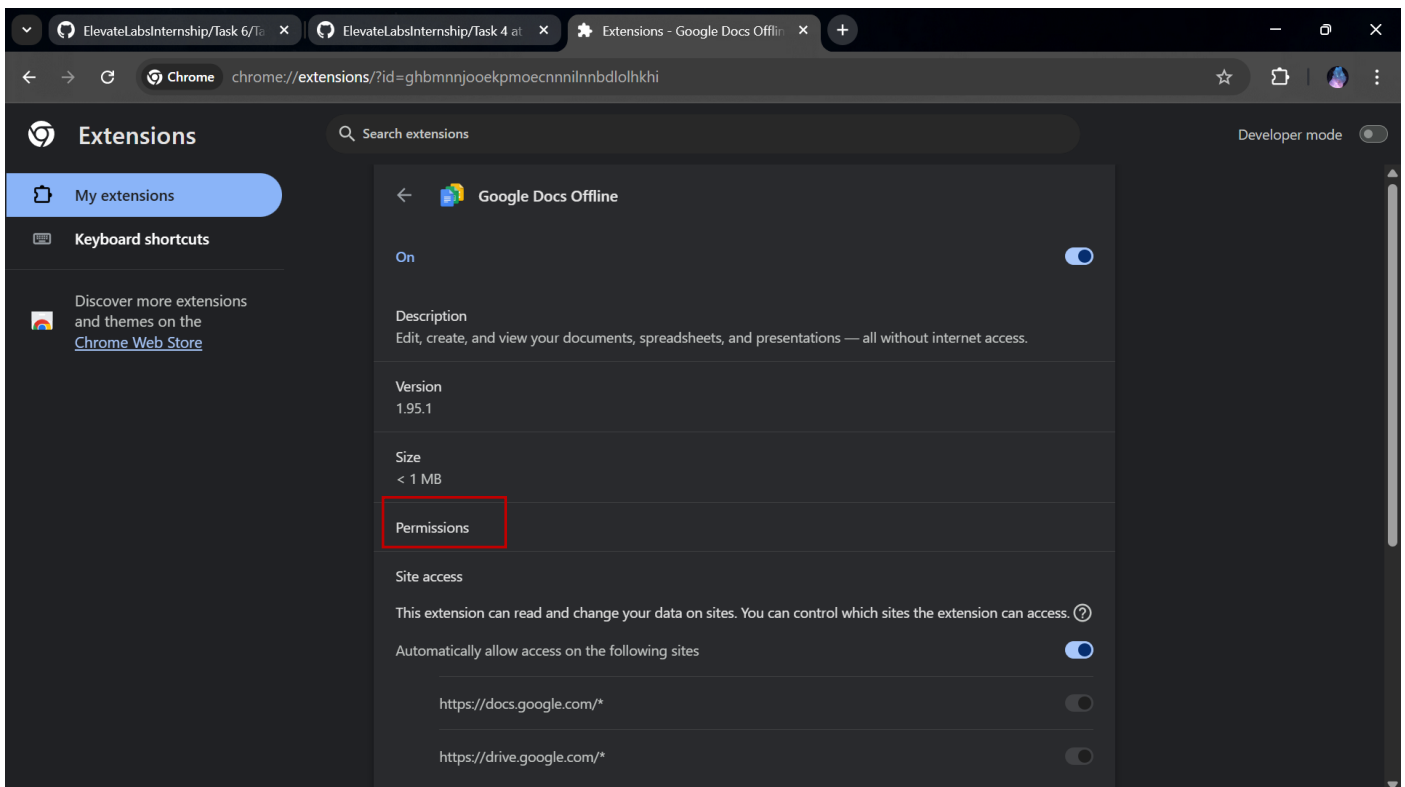

Nothing suspicious found with this extension.

Name: Dark Mode

Purpose: Sets the mode of every site visited to dark mode, without explicitly changing the theme.

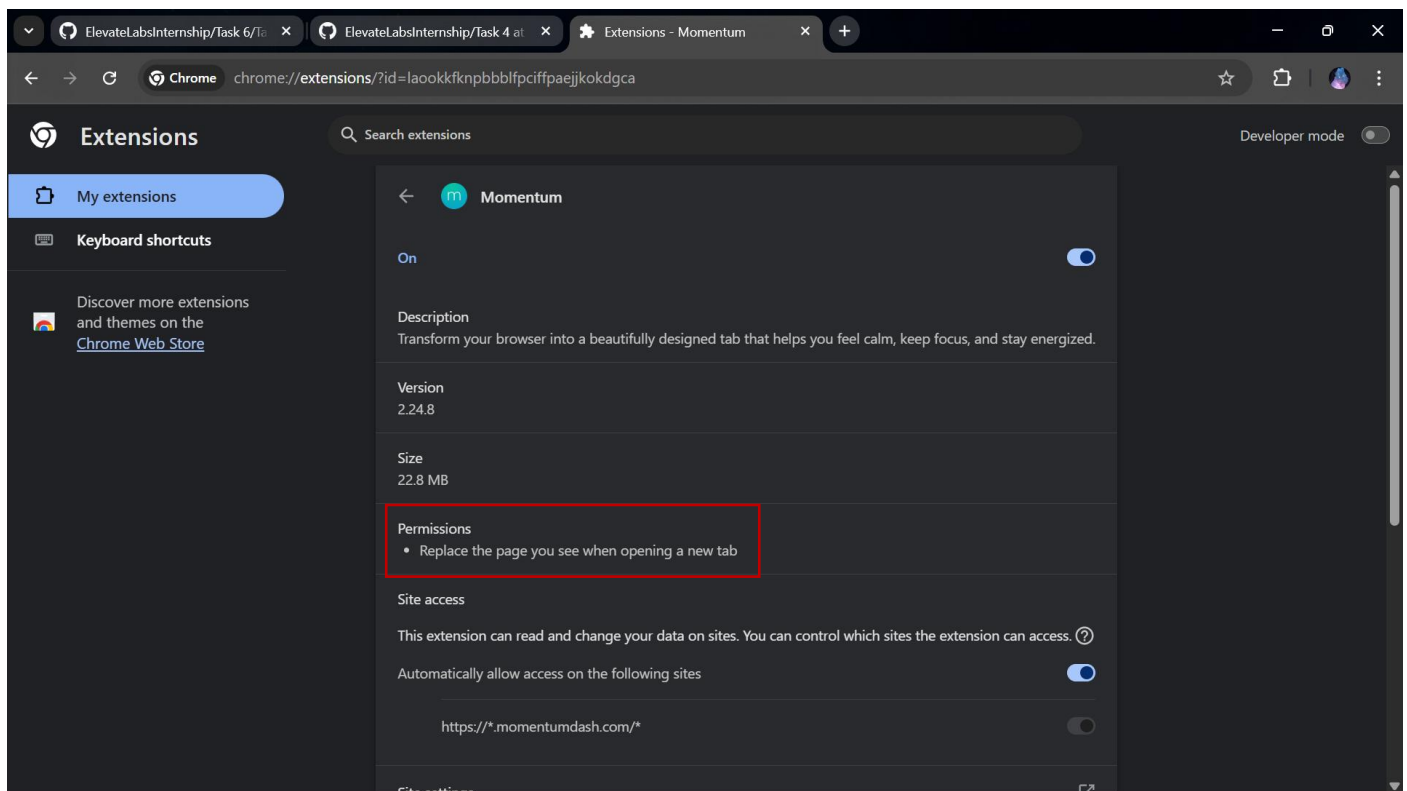

Nothing suspicious found.

Name: Google Docs Offline

Purpose: Enables users to access, update documents, spreadsheets and presentations without internet access.

Nothing suspicious found.

Name: Momentum

Purpose: enhances the browser's new tab intuitiveness making it more productive centric, inspiring personalized dashboards.

Nothing suspicious.

## **Risks of Malicious Browser Extensions**

### **1. Credential Theft**

- Malicious extensions can steal usernames, passwords, and sensitive data by monitoring web forms.

### **2. Data Harvesting**

- They can track browsing activity, collect search history, and even capture financial details.

### **3. Ad Injection & Redirects**

- Extensions may inject ads on legitimate websites or redirect you to phishing or scam sites.

### **4. Session Hijacking**

- Some can steal cookies and session tokens to impersonate you on websites.

### **5. Keylogging**

- They can log every keystroke you type, including passwords and personal messages.

### **6. Crypto Mining**

- Background mining of cryptocurrency without your consent, consuming CPU resources.

### **7. Downloading Malware**

- Extensions can download and install additional malware onto your system.

### **8. Bypassing Security Controls**

- Some extensions can disable browser security settings or install backdoors.

## **Best Practices Learned**

- Install extensions only from trusted sources and verified developers.
- Always review permissions before installing an extension.
- Remove unused or rarely used extensions regularly.
- Keep extensions updated to the latest version.
- Avoid granting unnecessary permissions to any extension.

## **Findings**

- Total extensions checked: 4
- No suspicious or unnecessary extensions were found.
- All extensions had proper permissions and positive user reviews.
